GitHub: github.com/YourUsername

Portfolio: yourportfolio.vercel.app

TECHNICAL SKILL :

❖ Programming Languages:

- Python
- C
- JavaScript
- SQL

❖ Web Development:

- HTML5
- CSS3
- Bootstrap
- Flask
- REST API

❖ Artificial Intelligence:

- Machine Learning
- Pandas
- Data Analysis
- NumPy
- Scikit-learn
- XGBoost

❖ Database:

- MySQL
- SQLite

❖ Tools:

- GitHub
- VS Code
- Jupyter Notebook
- Git
- Arduino IDE
- VirtualBox

❖ Concepts:

- Object-Oriented Programming
- Data Structures
- Problem Solving
- Operating Systems

CERTIFICATIONS:

- Data Analytics with Python
- The Joy of Computing Using Python
- Red Hat System Administration

B. Tech Artificial Intelligence and Data Science student with strong interest in Artificial Intelligence, Machine Learning, Python Development, and Full Stack Web Development. Experienced in developing AI-powered applications, Arduino-based embedded systems, and real-time data analysis projects. Passionate about solving real-world problems using technology and continuously learning modern software development tools. Seeking internship opportunities to apply technical skills while contributing to innovative projects.

ACADEMIC HISTORY:

❖ B. Tech. | Artificial Intelligence & Data Science (7.3 CGPA, till 02nd Sem.):

CSMSS Chh. Shahu College of Engineering, Chhatrapati Sambhajnagar.

DBATU, Lonere, Raigad, Maharashtra (2024 to 2028)

❖ 12th (HSC) (62.50%):

Shri Jagdanba High School Mahur.

Maharashtra State Board (2022 to 2024)

PROJECTS:

❖ AI Trading Analysis Web Application:

• Technologies:

Python, Flask, Pandas, Machine Learning

• Description:

- Developed an AI-powered web application for financial market analysis.
- Implemented machine learning algorithms to generate Buy/Hold/Sell predictions.
- Integrated real-time market data visualization.
- Improved prediction accuracy through feature engineering and model optimization.

❖ Solar Panel Cleaning System:

• Technologies:

Arduino Nano, Bluetooth HC-05, L298N, Submersible Pump

• Description:

- Designed an automated solar panel cleaning system using Arduino Nano.
- Controlled cleaning operations through Bluetooth communication.
- Reduced manual maintenance effort.
- Demonstrated embedded system integration using sensors and motor control.
